## NEW RECTOR OF ST. ANDREW'S.

Rev. Randolph Ray, the new rector of St. Andrew's Episcopal Church of this city, is expected to arrive now every day. He would have been here some time ago, but has been detained by the illness of his father at Madison Station, Miss.

Mr. Ray gives the following sketch of himself in a letter to one of his parishioners in this city:

"Thinking perhaps it would interest you and other members of St. Andrew's, I am enclosing my photograph and give here a brief sketch of my life. I was born June 11, 1885, in Madison County, Mississippi, on a cotton plantation, of Virginia parentage, my father being an officer in the Confederate army, having seen four years of very active service in Virginia, having been especially mentioned by his commanding officer for brave and gallant service at Gettysburg, where two

Magazine, entering the General Theological Seminary later, and graduating from that place two and a half years ago, since which time I have been connected with the Church of Zion and St. Timothy, one of the largest and busiest churches in this city. I am writing this merely to give you and those interested in me as your new rector what I consider only your natural due, some little information concerning me."

Mr. Ray's library and personal effects have been here for some time and have been installed in the rectory where he will reside, and which is already furnished for him. Mr. Ray is a single man.

The elegant new Episcopal Church is expected to be ready by April 1, and in case the rector arrives before that time, the old church will be used until the new one is completed.

## FAMILY AVOIDS SERIOUS SICKNESS

By Being Constantly Supplied With Thedford's Black-Draught.

McDuff, Va.—"I suffered for several years," says Mrs. J. B. Whitaker, of this place, "with sick headache, and stomach trouble."

Ten years ago a friend told me to try Thedford's Black-Draught, which I did, and I found it to be the best family medicine for young and old.

I keep Black-Draught on hand all the time now, and when my children feel a little bad, they ask me for a dose, and it does them more good than any medicine they ever tried.

We never have a long spell of sickness in our family, since we commenced using Black-Draught.

Thedford's Black-Draught is purely vegetable, and has been found to regulate weak stomachs, aid digestion, relieve indigestion, colic, wind, nausea, headache, sick stomach, and similar symptoms.

It has been in constant use for more than 70 years, and has benefited more than a million people.

Your druggist sells and recommends Black-Draught. Price only 25c. Get a package to-day.

## FIRST BAPTIST SUNDAY SCHOOL.

The indications now are that tomorrow will be a day of beautiful sunshine. Will you not come to Sunday school and help make the Lord's day and His work one of great glory and success? The Harmony Quartet will sing, while Dr. George B. Butler will speak and conduct a spiritual service. Parents, come. Children, will you not disappoint us. We hope to have 400 present. The past three Sundays we have had over 330 in attendance. As Napoleon once said, "Let every man do his duty."

JOHN A. MOORE JR.,  
Sunday School Superintendent.

Thursday—St. Joseph's feast—Low Mass at 8 a. m. Solemn High Mass at 11 a. m., followed by sermon and benediction. Evening devotion at 7:45 p. m.

J. B. GLEISSNER, Pastor.

## WEATHER FORECAST

(Copyrighted, 1914, by W. T. Foster.)

Washington, March 14.—Last bulletin gave forecasts of disturbance to cross continent March 19 to 23, warm wave 18 to 22, cool wave 21 to 25. This will be a dangerous storm from the Pacific to the Atlantic and all are again urged to use the utmost care and caution. Many lives will probably be lost in that storm and much property destroyed. We cannot now closely locate the path of that storm, but the time is not far away when we can locate such dangers.

In the bulletin of February 7 we gave warning of a dangerous storm for about March 1. That was a remarkably good forecast. It is to be regretted that people get used to dangerous storms and then get caught in them. You will never regret following our forecasts of dangerous storms from this to May 9. Arrange all of your affairs to fit in with these forecasts and you will later be thankful that you did.

Next disturbance will reach Pacific coast about March 25, cross Pacific slope by close of 26, great central valleys 27 to 29, eastern sections 30. Cool wave will cross Pacific slope about March 28, great central valleys 30, eastern sections April 1.

This will be much like the previous storm and very dangerous. You can well afford to stand guard for two weeks or more from March 14 to April 2. The most dangerous dates will be near March 19, 24 and 29. Watch the locations of the lows, or storm centers and particularly the south east portions of them; the destructive storms usually occur therein.

We are of opinion the storm paths will lie eastward along or not far from latitude 39 and that the greatest danger will be along that line in the great central valleys. Temperatures will range high as the storm approaches.

Precipitation will, in a general way, average light with this storm but heavy downpours are expected over a few small localities. Most general rainfall will be about the Mexican gulf and in the south Atlantic sections. Northern parts of South America will get full average rains.

After the cold spell that will cross continent March 15 to 22 good crop weather is expected and good time for planting and sowing south of 28. Cultivation of the soil this coming crop season should be with the expectation of less than normal rainfall. Where the soil was frozen wet last December the crops will start under favorable circumstances. Small grain should be drilled deeply and corn planted in the bottom of the furrow. Low ground will bring the best crops. Of course there will be exceptions to the rules but they should be followed generally.

This will be a prosperous year; all products will bring good prices. Whatever the planter and farmer can produce will bring good returns. Our national finances will encourage all kinds of business and the best energies of every individual should be put forward. Mexico has been stripped bare of all products and must be replenished. The chaos down there can not continue. If general peace is restored or if war with Mexico results, in either case the 20,000,000 of people down there must draw heavily on our resources and that will strengthen demand and prices for our products.

The high cost of living will not stop till the people discontinue their extravagances. In a general way the masses have double the comforts of fifty years ago and the demands on producers are double. How can prices go down while the demands are increasing? The standards of prices and of living will not materially change.

## THIS DAY IN HISTORY
